Jeep: Wrangler

THE MOST CAPABLE WRANGLER EVER

The New Jeep Wrangler has a unique, distinctive character that sets it apart from its utilitarian competitors. Its rugged 'go anywhere' reputation and new, more comfortable on-road drive experience now give it a broader appeal. We want to give dealers compelling, targeted creative that enables them to reach new prospect groups in their local area, and insights and intelligence to demonstrate and reassure that these markets do exist.

Lead imagery features the Jeep Wrangler in settings true to its uncompromising off-road credentials, emphasising the marque's iconic looks, distinctiveness and statement presence. The dealer can choose which vehicle to hero and test/change imagery depending on audience responsiveness.

Lead messaging encourages local prospects to feel a strong sense of identification with the Jeep Wrangler's tough spirit and unapologetic sense of adventure. We want to create instant recognition 'this suits me and my life' and make it clear how the Jeep Wrangler could enhance their lifestyle, fit their identity and aspirations, their desire for social standout and distinctiveness.

Supporting messages focus on features and benefits selected in order of audience priority – building appetite and desire to know more. Calls to action drive through to information capture and 1-2-1 conversations / showroom visit / online chat for lead qualification.
